★ The Semco Promise ★

Semco Stone owns and operates our own quarries. We pride ourselves in providing a natural and quality product. Our diverse building stone collection has some of the most unique products you will find. The beauty of our products is they are made from natural stone, therefore variations should and can be expected. Even though colors in this brochure are as close to the actual stone as possible, photographic and printing techniques – and even actual viewing conditions – can alter perception of color.

Selections should be made from actual samples whenever possible, but even samples can vary from the delivered product simply because the beauty of natural stone is that each piece is unique. Semco Stone does the best we can to maintain consistent colors and textures. Communication is key with masons, contractors and your sales representative so that Semco can do our best to provide exactly what you need to complete your dream project.

As the largest distributor of natural stone products in the Midwest, at Semco Stone, we have earned our reputation through consistent products, advancements in technology, and quality and service that exceed industry standards, laying a solid groundwork for your success. We operate to ensure lasting satisfaction and something our customers can enjoy for years to come.

"People don't buy what you do; they buy why you do it. And what you do simply proves what you believe."
